

# Eddie Perez:

“How Do We Save Hartford?  
Get Rid of the Residents!”

**HARTFORD** is one of the US's poorest cities in the country's richest state, suffers from severe systemic racism,

and the fact that the jobs that made the US the richest nation in the world are simply not here anymore.

So Eddie's solution is to move in rich white folks from the suburbs. What he doesn't tell you is that in every single city where this has been tried, the poor folks are forced out by the rising cost of living, because of the arrival of wealthy new colonizers!

**It's like ethnic cleansing, without the trouble of hiding the bodies. Who says white supremacy is just for whites?**
